

# Schablone zur Ringgrößenermittlung

1. Falten Sie die Schablone an den gestrichelten Linien
2. Schneiden Sie anschließend an der Kreislinie einen Halbkreis aus
3. Mit dem dadurch entstehenden runden Ausschnitt, können Sie nun Ihre Ringgröße ermitteln

## Hinweis:

- Achten Sie darauf, dass sich der Ausschnitt fest an den Finger anschließt.
- Der Ausschnitt darf über dem Fingerknöchel etwas spannen.
- Breite Ringe müssen oft etwas größer sein als schmale Ringe.
- Die Zahl unter dem Kreis bezeichnet den Durchmesser
- Die Zahl oberhalb des Kreises ist unser Ringmaß

# Pattern for ring size determination

1. Please fold the pattern towards the lines
2. Then cut half circles from the circle lines
3. The resulting cleavage helps you to find out your ring size

## Please note:

- Make sure that the cleavage lies tightly on your finger
- The cleavage can be tight on your knuckle
- Wide rings often have to be a little bigger than thin rings
- Number under the circles describes the diameter
- The number above the circle is our ring size
